

Where are you in the field?

What do you call integrated data systems?

How long has AISP been sending you (helpful? annoying? amazing?) emails:

What has energized you during this meeting?

Shared pain

Nerds being excited about nerd stuff

Racial justice in our data systems

Connecting with my peeps

Meeting people who get it

hearing about all the growth and change that has happened since our last meeting in 2019!

Sandbox as added value

Contacts with potential collaborators

Realizing we're actually doing cool things

What has energized you during this meeting?

Thinking about how to dig deeper on equity in integrated data

Shared experiences and novel solutions

Q&As from audience members

It's energizing to be with "my people"

New Legal Framework

Collaboration

Potential collaborations

Networking

Newfound appreciation for the importance of this work

What has energized you during this meeting?

Great community of people willing to discuss the tough stuff - like minded people

ECIDS

Social Theater

Central Demographic tables

The new legal resource

More communications- focus on building common languages

Time to think about the work but not alone

Update on the legal data sharing agreements, racial equity possibilities

Consent options, communication strategy, commiserating

What has energized you during this meeting?

Great sharing of solutions

Innovation in using and sharing back data

Networking

Real people spontaneous conversations

Kind, brilliant people

Brainstorming

Expanding legal framework

Ethical nuance

Networking is gold

What has energized you during this meeting?

New connections and ideas

Social theater

Networking

Starting with baseline knowledge and having sophisticated discussions

Being able to connect in person with folks who understand the challenges is really energizing and reaffirming

Lunch

Support encouragement network

Successful projects

Coffee

What has energized you during this meeting?

Drinks

Commiserating/ solution workshopping

You have

I used to think....but now I think....

This was hard, but now it's harder

No...yes!

This was impossible, it's just really hard

I used to think we were pioneers in this work, but now I know we don't have to reinvent the wheel

I used to think it was ASPE but now i know it's AISP

I used to think we were unique but now I think we all have a lot in common

We were the only agency that used opt out consents

DSAs were busy paperwork. Now I think they are an essential tool.

I was the only one....I'm special in other ways

I used to think....but now I think....

Data sharing is difficult... It's still difficult

Laws prevented data sharing now know they provide guardrails

I used to think the Liberty bell was the place to visit but now I know it's the rocky statue

I used to think we had unique issues, but now I think we have a network of support.

I used to think that everyone was ahead of my jurisdiction, but now I think that we're all in different places and struggling/making progress together

Sharing individual student records covered by FERPA with HIPPA Business Associate Agreement signatory agencies

We were close to arriving... We were just underway...

I was alone... I have friends!

Money gifted to residents does not count towards their income eligibility requirements

What is a sticky idea--an idea that you're going to keep thinking about after this meeting??

Equity

How to better infuse equity in data quality and data use discussions

Research ideas and directions

Racial justice withon our data systems

University partnerships

Conscious mistrust

How to find and study those families or children not in our data systems

How to fill out the data landscape for early childhood

Race explicit language into data license requests

What is a sticky idea--an idea that you're going to keep thinking about after this meeting??

Friction of human contact

Incorporating more community and public voice in our work

Better understanding data governance, risk, and potential around demographic data.

Collaborative opportunities

Paying research participants as much as the researchers

Hasn't come up - when is time to give up with a partner

What's the low hanging fruit?

Structure of IDS set-ups, federated models, hybrids, lakes

Role of community in the IDS logic model

What is a sticky idea--an idea that you're going to keep thinking about after this meeting??

Data sharing guidebook
Awareness of white cultural norms

Opt outs. And the idea of a data sharing guidebook.

Improving data governance for the next generation

That we work better together

How to construct relationships and systems that survive personnel turnover

Partnering with "trust busters"

How do other sites manage the creation and maintenance of concepts across their systems

Common opt-out consents

Executing mixed methods + more qual studies like the two gen SUD study that Cass shared

What is a sticky idea--an idea that you're going to keep thinking about after this meeting??

Subversive curiosity

Where community can help advance policy solutions

How do you change the incentive structures of data integration so that the incentive is to share rather than resist? Right now resistance is a logical default - how do we change that?

How to truly engage community voice in our work

What do I do with these results?

Build a better mousetrap, in regards to standardizing data collection

Richard's "whose privacy are we protecting" question when discussing front line workers hesitancy re data sharing.

Lawyers are human beings

Who gets to decide why we integrate data

What is a sticky idea--an idea that you're going to keep thinking about after this meeting??

Love the data sharing guidebook idea

"Accessmyinfo"

How KY got 45 staff

How good is good enough for data quality?

Partnering with leaders s and community on what questions to ask

Advancing technical processes and sharing them

Learning agenda

Allegheny's timeline view

Modernizing data systems work with more than just IT tech solutions

What is a sticky idea--an idea that you're going to keep thinking about after this meeting??

Sourcing funding

Multiple specific people

That I'm no longer a lone heretic - now I'm part of a cult

What is the most important idea/resource/connection you are leaving with today?

Data sharing guidebook

New friends

John Fantuzzo and Sue Gallagher fan club

Definitely the warm fuzzies

Legal guidebook

Contacts for potential new project ideas

Data sharing guidebook

Remembering that it's messy and hard and takes a long time but so worth it.

Great to connect with people in 3D

What is the most important idea/resource/connection you are leaving with today?

A bench as welcoming / generous as it is deep

Emails for Technology to link deidentified data

learning from data sharing peers

How gratifying it is to watch heads explode

All the amazing ways this data is being used for good

That I am no longer a lone heretic, I'm part of a cult!

All the social workers!!!!!!

ClientView application

Tough challenges but feel better about all the smart folks in the room working on this

What is the most important idea/resource/connection you are leaving with today?

Cheesesteak

Networking events/opportunities

More help on multi-level/jurisdiction data sharing (e.g., state-local, feds-state, etc.)

What should AISP do more of (or less of)?

More convenings!

Need to show how centering equity has changed research.

More help connecting with advocacy spaces

As academics to ask fewer questions at these events

hear more from community members

More of how to communicate data sharing and use to the people

Doctoral fellowships

Build on the "what" to do more "why"

More about how sites actually integrate not just identities but other data elements

What should AISP do more of (or less of)?

More visits to us network sites!

State level / multi departmental collaboratives

More direct outreach to state agencies not in the network

Technical insights and collaborative tools for data integration and analytics

Connecting us directly. I've heard about the people/entities in this room for 3 years but never had names to connect. (But could have asked myself)

How do we train more ids workforce?

Networking meetings/opportunities

More research or consultation on communicating/messaging on equity ie frameworks institute

Less academic, more policy focus

What should AISP do more of (or less of)?

In person meetings are so valuable! I really also like the virtual learning sessions on specific topics

How to take policy challenges to research questions

Virtual data site visits

More sites for the equity learning collaboratives

More targeting and connecting people in similar roles - get academic people together, state agency people together,

<3

Site fellowship placements
